Fiscal & Custody Metering Systems

S

Semac Group
Construction • Automation

Semac Construction is dedicated to the design, engineering, production, project oversight, testing, and certification of fiscal and custody metering systems tailored for the Oil & Gas, Petrochemical, and power generation sectors.

We ensure that all our delivered systems adhere to international standards and are customized according to the specific design needs of our clients.

We Cover:

- ✓ Engineering
- ✓ Procurement
- ✓ Complete Fabrication and Testing
- ✓ Commissioning and Start-up
- ✓ Training and Support

Our Metering Systems may include:

- Metering control and Supervisory systems (for monitoring, control, etc.)
- Flow Computers
- Distributed Control Systems (DCS)
- Sampling Systems and Analyzer packages, ranging from a single analyzer to a full analyzer shelter with all associated systems
- Fire & Gas Systems

➤ Provers (including Remote, Portable, Uni or Bi-directional, Master meters, etc.)

We Offer:

- Simple meter tubes: Ideal for basic flow measurement.
- Complete skid-mounted or packaged units: Pre-assembled and ready for immediate deployment, these systems offer a comprehensive solution for complex measurement requirements.

Our systems include control & supervisory packages for real-time data monitoring and management.
