

## Struggling with Level Measurement Challenges?

The OPTIWAVE 1520 may be the solution

### ? Do These Challenges Sound Familiar?

- Level monitoring in harsh outdoor environments
- Accurate measurement in open or pressurized tanks
- Measuring levels in granular silos or small silos with sand and gravel

- Tackling level measurement of sewage, sludge, treated water, or waste in the water and wastewater industry

💡 If these are your daily challenges, the [OPTIWAVE 1520](#) is your perfect solution:

This 80 GHz radar level transmitter by KROHNE is designed for basic applications requiring reliability and durability. Its robust, IP68-rated housing and PVDF Lens antenna ensure consistent performance even in confined spaces, heavy rainfall, or flooding. Ideal for pumping stations, screw lifting stations, rainwater basins, and more, it provides precise readings, even with condensation or moving surfaces.

✅ With Bluetooth® commissioning via the KROHNE OPTICHECK Level Mobile app and continuous self-diagnostics, this innovative radar offers a seamless, hassle-free experience.

👉 Discover how the [OPTIWAVE 1520](#) can revolutionize your level measurement processes today!
